\*SBU (2-digit) / PG (3-digit) / PUG (3-digit) / Type (10-digit)

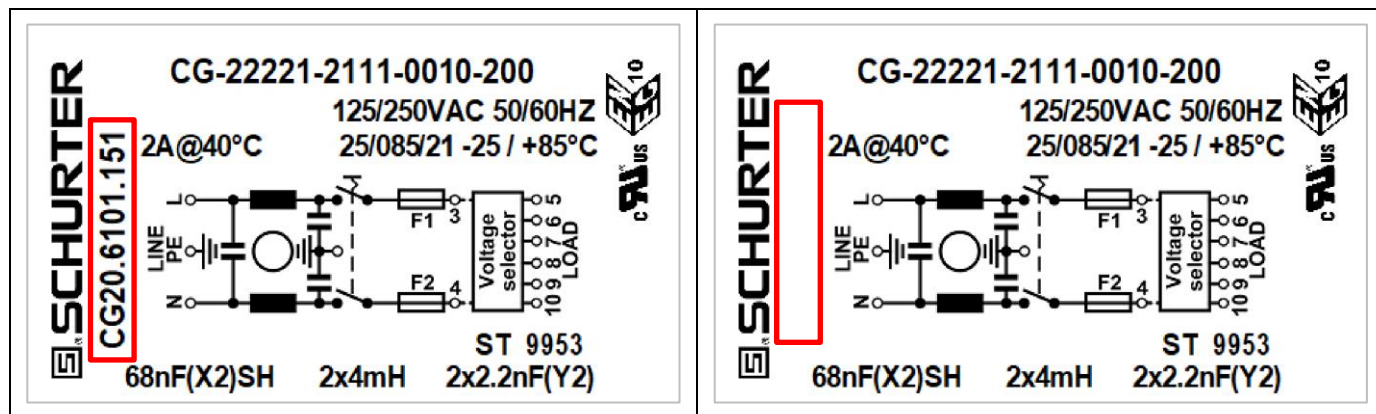

## 2 Type of change

- Change of production process
- Change of label

## 3 Detailed description of change

| Current product appearance                                                                                                                                                                                                       | New product appearance                                                                                                                                                                                                            |

- Improvement of manufacturing process
- P/N removed from product label

#### 4 Reason of change

- Production process improvement: Change from spotwelding to TOX clinching
- Production optimisation: Separation of the part and the packaging unit; the configuration code remains on the product, and the item numbers are printed on the packaging label.
- This change is part of the continuous improvement process

#### 5 Release date

The change takes effect in ww 48/2026 (Date code 2648 or higher on label).  
Parts on stock will be used upon depletion.

#### 6 Impact of change and recommended action
